

# CSE 352 – Artificial Intelligence

## RESOLUTION HOMEWORK

**1.** Find all possible resolvents of

A)  $\Delta = \{ \{a, \neg b\}, \{a, b, c\}, \{\neg a, c\}, \{\neg c, \neg b\} \}$

B)  $\Delta = \{ \{a, \neg a, \neg b\}, \{a, b, c\}, \{\neg a, \neg b, \neg c\}, \{b\} \}$

**2.** Use a proper Resolution strategies do decide whether  $\Delta$  is unsatisfiable or satisfiable.

A)  $\Delta = \{ \{a, \neg b\}, \{\neg a, \neg b\}, \{b, c\}, \{a, \neg c\}, \{\neg a\} \}$

B)  $\Delta = \{ \{a, \neg b\}, \{\neg a, \neg b\}, \{b, c\}, \{a, \neg c\} \}$

C)  $\Delta = \{ \{a, b\}, \{\neg a, b\}, \{b, \neg c\}, \{a, \neg c\} \}$

**3.** Use resolution (proper strategy) to decide VALIDITY of the following argument:

A1:  $( ((a \rightarrow \neg b) \rightarrow (b \rightarrow \neg a)) \vee ((a \rightarrow \neg c) \vee b) )$

A2:  $((a \rightarrow b) \rightarrow a)$

B:  $(\neg(a \rightarrow (\neg b \wedge c)) \rightarrow (a \wedge (b \wedge \neg c)))$

Remark: To verify the VALIDITY of  $((A1 \wedge A2) \rightarrow B)$ , we have to test if  $\neg((A1 \wedge A2) \rightarrow B)$  is unsatisfiable.
