CONTENTS

1 Regular Languages

1.1 Strings and Languages

1.2 Regular Languages and Regular Expressions

1.3 Graph Representations for Regular Expressions

2 Finite Automata

2.1 Deterministic Finite Automata

2.2 Examples of Deterministic Finite Automata

2.3 Nondeterministic Finite Automata

2.4 Converting an NFA to a DFA

2.5 Finite Automata and Regular Expressions

2.6 Closure Properties of Regular Languages

2.7 Minimum Deterministic Finite Automata

2.8 Pumping Lemmas

3 Context-Free Languages

3.1 Context-Free Grammars

3.2 More Examples of Context-Free Grammars

3.3 Parsing and Ambiguity

3.4 Pushdown Automata

3.5 Pushdown Automata and Context-Free Grammars

3.6 Pumping Lemmas for Context-Free Languages

4 Turing Machines

4.1 One-Tape Turing Machines

4.2 Examples of Turing Machines

4.3 Multi-Tape Turing Machines

4.4 Church-Turing Thesis

4.5 Unrestricted Grammars

4.6 Primitive Recursive Functions

4.7 Pairing Functions and Gödel Numbering

4.8 Partial Recursive Functions

5 Computability Theory

5.1 Universal Turing Machines

5.2 R. E. Sets and Recursive Sets

5.3 Diagonalization

5.4 Reducibility

5.5 Recursion Theorem

5.6 Undecidable Problems

6 Computational Complexity

6.1 Asymptotic Growth Rate

6.2 Time and Space Complexity

6.3 Hierarchy Theorems

6.4 Nondeterministic Turing Machines

6.5 Context-Sensitive Languages

7 NP-Completeness

7.1 NP

7.2 Polynomial-Time Reducibility

7.3 Cook's Theorem

7.4 More NP-Complete Problems
