Lab 9 – CSE 101 (Spring 2021)

Objectives

This is a lab to get further practice and with object-oriented programming in Python and learn about using a variable number of arguments in functions.

Instructions

The instructor will go through Chapters 34, 35, 36, and 37 in the "How to Code in Python" by Lisa Tagliaferia.

You are expected to follow along and write the code from the chapters to test your understanding. Please ask any questions you have around these topics.

At the end, you will submit the files you have created on Blackboard (5 points).
