Suggested Slides Are Only Hints

Many of the best talks on day 1 will use more than 4 slides. Most will have more than one image. Slides with colors may work well.

If you show 5 to 8 slides, make sure you can cover all the material without talking too fast. Very rapid speech is poorly understood and may bore listeners.

Lists in large fonts are better on slides than long paragraphs in smaller fonts.

Avoid backgrounds that hide your text.
Derive your talk from your memo2 submission, but with visual aids, 4 to 8 slides. Explain why you need a new computer, its type, and how it will increase your value to the firm. (In doing so, let me know what is your job and your company’s business, but in a way that will not bore your boss, who knows what business, but not why you need a new machine for your own job.) Describe the key technical features of your new computer; tell why each one is critical for you to do your job more efficiently. Precisely specify the computer brand, model, cost, and vendor. Convince your boss to spend a little money.

On a References slide after the conclusions slide of your talk, list all web and printed references used for your talk, including the precise URLs of all websites which gave you details about your old computer and your desired new computer.
 Talks on Why I Need a New Work Computer began in class Tuesday, 20 March 2012.

Assume the reader is your computer-savvy, but non-expert boss in a company with 20 or fewer employees. The boss has announced that the firm will buy new computers for some employees, those most needing new ones for their jobs. Justify why the firm will benefit from buying you (or your team) new computer(s). Be clear why you need a new machine, what computer model with what features, and what total price from what source. Address your boss politely. Avoid subtle insults such as “As you probably know,”.

Aim for a 7-minute (6-8 min.) talk to your boss and colleagues in your company. Persuasively request a new computer for your work. Bring your own laptop (Mac or PC with VGA capability) or bring your power point slides for a PC on a USB stick or CD.
